The 2014 Honoring Texas Victims Report
By the Numbers Summary

The Honoring Texas Victims Report is the only comprehensive analysis of fatalities of women in Texas by a male intimate partner. By providing in-depth exploration and examination of these cases, TCFV seeks to advance statewide responses to intimate partner violence and renew collective commitment to ending it. TCFV’s annual publication of the Report promotes our belief that intimate partner fatalities are knowable, predictable, and ultimately, preventable.

Consider utilizing this information to galvanize your community in joining statewide efforts to prevent intimate partner violence.
