

# HONORING TEXAS VICTIMS

IN MEMORY OF  
THE TEXAS WOMEN  
& MEN KILLED BY  
THEIR INTIMATE  
PARTNERS IN 2018

Each year, domestic violence ends the lives of Texas women, men, and children. These losses, in turn, devastate families and distress communities. The Texas Council on Family Violence documents the narratives of victims of intimate partner violence homicides to both honor those whose lives are lost to domestic violence and to inform our work to close system gaps and change the culture that minimizes intimate partner abuse.

Historically, TCFV's report has documented women killed by their male intimate partners. For this report, TCFV expands the review to include cases of men killed by female partners, and men and women killed by same-sex partners. With these changes, we hope to further inform community conversations, interventions, and solutions to domestic violence.

Each confirmed fatality represents a woman or man killed by an intimate partner or a stalking perpetrator between January 2018 and December 2018, and includes the date of the death, followed by a short description of the circumstances. TCFV includes additional relevant information when available through media and law enforcement reports. This information highlights lethality risk factors and other information that informs our best practices for enhancing future survivor safety.

On the following pages, the Texas Council on Family Violence lists with respect and care the names of each victim of intimate partner homicide in 2018. TCFV joins their families, friends, and communities in mourning the deaths of these individuals.

*“Her  
strength  
and courage  
touched the lives of  
everyone she knew.”*
